

Irzan Aldi Ananto

Senior Fullstack Developer

+62) 895-2662-7141 | irzanaldi@gmail.com | linkedin.com/in/irzan-aldi-ananto-688819214 Tangerang Selatan, Banten, Indonesia

PROFESSIONAL SUMMARY

Senior Fullstack Developer with 5+ years building end-to-end applications for retail & eCommerce — taking vague user pain points and requirements all the way through backend, frontend, and database to production. Specialized in microservices and event-driven architecture across an 11-service ecosystem (Kafka, Redis), data warehousing and ETL, and real-time systems. Hands-on with NestJS, Next.js, Laravel, Vue.js, Go, Python, and Flutter, working with an AI-augmented workflow (Claude Code, Obsidian). Delivered CMS/ERP platforms, POS systems, centralized order management, and real-time inventory for companies including The Body Shop Indonesia and HW Group.

WORK EXPERIENCE

The Body Shop Indonesia — Senior Fullstack Developer

Aug 2023 — Present

- Architected RESTful and event-driven APIs (NestJS, Go) across an 11-microservice ecosystem, improving communication between services and integration with legacy systems through Kafka messaging and Redis.
- Developed a Smart Admin Panel (Next.js) giving the operations team a single streamlined interface to manage data across 8 departments (Operations, Warehouse, Finance, Marketing, Customer Service, HR, CRM, Staff) and 11 microservices — orchestrating end-to-end operations, from incoming orders at 100+ stores into a centralized order management system.
- Built a real-time inventory system synchronizing stock across stores and the e-commerce platform, with expiry-date tracking, analytics, and smart reminders that flag soon-to-expire products before they turn into losses.
- Designed a data warehouse consolidating data from 11 microservices and POS channels, with ELT pipelines — Python for source extraction, dbt for in-warehouse transformation and data cleansing, orchestrated with Dagster — powering analytics and reporting.
- Built and integrated promotional features (vouchers, campaigns) for the e-commerce platform, supporting marketing initiatives and online sales growth.
- Maintained and enhanced the Flutter-based POS system, ensuring reliable in-store transaction processing.
- Implemented CI/CD pipelines with Jenkins for automated build, test, and deployment across services.

HW Group — Backend Developer

Oct 2021 — Aug 2023

- Designed and developed RESTful APIs using Laravel, serving as the backbone for internal business operations and client-facing services.
- Built a customer management CMS using Livewire, streamlining data operations and reducing manual data entry for the team.
- Contributed to a Point of Sales (POS) CMS using Vue.js and managed ongoing system maintenance and bug fixes.

PROJECTS

The Body Shop Indonesia

- **Centralized Order Management & Smart Admin Panel** — Next.js operations hub aggregating orders from 100+ stores into a centralized OMS spanning 11 microservices, used across 8 departments.

- **Real-time Inventory** — Stock synchronization across stores and e-commerce, with expiry-date tracking, analytics, and smart reminders for soon-to-expire products.
- **Data Warehouse & ELT** — Analytics warehouse consolidating data from 11 microservices and POS channels; Python ingestion, dbt transformations, orchestrated with Dagster.
- **POS System** — Flutter point-of-sale for in-store transactions: product scanning, payment processing, and sales reporting across outlets.
- **E-commerce CMS** — Next.js CMS for product catalog, promotions, and customer data.

HW Group

- **Livestock ERP** — ERP for livestock management with efficient stock input/tracking and automated reporting.
- **Sales & Purchasing ERP** — Internal asset-transaction ERP with automatic report generation for accounting and finance.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, PHP, Go, Python, Dart
- **Backend:** NestJS, Node.js, Express.js, Laravel, Go
- **Frontend:** Next.js, React, Vue.js, Livewire, Flutter
- **Architecture:** Microservices, Event-Driven Architecture, RESTful APIs
- **Messaging & Caching:** Apache Kafka, Redis
- **Data & Analytics:** Data Warehouse, ELT/ETL (Dagster, dbt, Python), MySQL, PostgreSQL, MongoDB
- **DevOps & Automation:** Docker, Jenkins (CI/CD), n8n, Linux, Git
- **AI Stack:** Claude Code, Obsidian
- **Tools:** Postman

EDUCATION

Universitas Pamulang — Bachelor of Technology in Information Technology *2016 — 2021*

LANGUAGES

- **Indonesian:** Native
- **English:** Professional Working Proficiency
